Baxa Corporation to Feature the DoseEdge™ Pharmacy Workflow Management System and New ExactaMix™ Compounders at 2010 ASHP Midyear Clinical Meeting

Baxa products, medical devices and systems deliver more than 164 million safe doses each year to patients around the world.

Anaheim, Cali and Englewood, Colo – At this week's ASHP [Midyear Clinical Meeting](#) (MCM), [Baxa Corporation](#), a leading provider of medical devices and systems that automate pharmacy operations, will showcase its solutions that efficiently deliver more than 450,000 safe patient doses each day. Featured products at booth #1841 include the [ExactaMix™ Automated Compounding Devices](#) (ACD) for mixing sterile, multi-ingredient solutions and [DoseEdge™](#), a complete pharmacy workflow management system. In its 45th year, the MCM begins today at the Anaheim Convention Center in Anaheim, California.

DoseEdge is the only comprehensive pharmacy workflow management software that offers barcode verification of ingredients, guided dose preparation workflows and image capture of the production process for pharmacist inspection. Through barcode verification of every drug ingredient, DoseEdge has prevented more than 100,000 preparation errors and has processed more than 5.6 million safe patient doses since its 2008 market introduction. To view technical videos or download educational materials on DoseEdge, visit www.baxa.com/doseedge.

The ExactaMix ACDs automatically compound sterile doses, minimizing the risk of measurement errors, wrong drug selection and patient infection in the preparation of solutions for TPN, cardioplegia, dialysis and epidural delivery. New at ASHP this year is the ExactaMix 1200 Device, which brings delivery precision and safe handling to pharmacies that want the compounding safety and efficiency of automation, but don't require the full range of capabilities offered by the ExactaMix 2400. The entry-level 12-port compounder equips small and medium-sized health-system pharmacies with the ability to automate micro and macro ingredient compounding, minimizing the risk of touch contamination and ensuring right drug and right dose delivery. The ExactaMix 1200 and 2400 are the only ACDs that provide both

volumetric delivery and gravimetric check, enabling pharmacists to ensure dose accuracy.

“Automation offers pharmacies a range of measurable and immeasurable benefits,”

commented Dennis Schneider, Baxa Senior VP of Marketing and Business Development.

“State-of-the art compounding technology streamlines the way pharmacy professionals work by improving workflow with greater speed and accuracy. This increases the confidence in their dose preparation and empowers pharmacists to focus on patient safety and care.”

Baxa invites MCM attendees to visit booth #1841 to witness what makes it the leading provider of pharmacy automation and specialty devices for the safe and efficient preparation, handling, packaging and administration of fluid medications. Founded in 1975, Baxa Corporation reliably and consistently enables pharmacists at more than 3,000 hospitals worldwide to safely prepare and administer oral and intravenous therapies.

About Baxa Corporation

[Baxa](#), a customer-focused medical device company, provides innovative, solution-based technologies for medication handling and delivery. Its systems and devices promote the safe and efficient preparation, handling, packaging, and administration of medications. Key products include the [Abacus® Order Entry and Calculation Software](#), the [DoseEdge™ Pharmacy Workflow Manager](#), [ExactaMed® Oral Syringes](#), [ExactaMix™ Automated Compounding Devices](#), [InFuse™](#) and [MicroFuse® Syringe Infusers](#), [Repeater™ Pharmacy Pumps](#), [NeoThrive® Enteral Syringes](#), the [PadLock® Set Saver](#) and the [RapidFill™ Automated Syringe Filler](#); used worldwide in hospitals and healthcare facilities. Its subsidiary [FHT, Inc.](#) produces the [IntelliFill® i.v.](#) automation. Privately held, Baxa Corporation has subsidiaries and sales offices in Florida, Canada and the United Kingdom; direct representation in Austria, Belgium, Denmark, Finland, France, Germany, Italy, Luxembourg, The Netherlands and Switzerland; and distribution partners worldwide.
