Baxa Corporation Introduces DoseEdge™ TPN Pharmacy Workflow Management Software for TPN Compounding

Englewood, Colo. – **Baxa Corporation**, a leading provider of medical devices and systems that automate pharmacy operations and increase patient safety, today announced the release of DoseEdge TPN, the industry’s first product for completely managing the workflow for automated TPN production. When used with Abacus® TPN calculation software and the ExactaMix™ 2400 Compounder, DoseEdge TPN provides automated support for the entire TPN dose preparation, documentation and inspection process.

“Automated TPN compounding is recognized as one of the most successful pharmacy technologies – adding safety, process control, accuracy and speed to what had been a labor-intensive and error-prone process of compounding TPN doses by hand,” notes Larry Gibson, Product Manager. “The Baxa DoseEdge Pharmacy Workflow Manager has supported the safe preparation of more than 1.5 million preparations. DoseEdge TPN leverages this experience – improving the TPN compounding process with complete workflow support and many patient safety enhancements.”

After automated TPN compounding is complete, DoseEdge TPN can help catch and prevent errors in the workflow and processes. The software also includes extensive new safety functionality for manual additions. Its pharmacist inspection capabilities, complete dose status tracking – displaying current status and status transitions – and long-term storage of detailed information permit better management and audit of the TPN dose preparation process. Additionally, DoseEdge TPN provides all of the benefits of the company’s leading DoseEdge Pharmacy Workflow Manager – including barcode verification of ingredients, automated volume calculations and photographic evidence of proper measurement and injection.

In a prior announcement, Baxa launched significant upgrades to the DoseEdge Pharmacy Workflow Manager. This Baxa DoseEdge Pharmacy Workflow Manager upgrade extends DoseEdge capabilities beyond IV preparation to encompass liquid doses such as oral medications.

Product Availability

DoseEdge TPN and the DoseEdge Pharmacy Workflow Manager are available immediately. For information about how DoseEdge supports lean pharmacy
