

"USP Chapter 797: Understanding the Revisions" Technical Paper By Baxa Corporation's Mike Hurst Now Accessible on Expert411.com For Media and Professional Reference

The "USP Chapter 797: Understanding the Revisions" technical paper, authored by Baxa Corporation's Mike Hurst, RPh, MBA, is now accessible at Expert411.com for media and professional reference. USP Chapter 797 became official on January 1, 2004. The first major revision was released on December 3, 2007, following years of soliciting feedback and the review of hundreds of responses by the USP Sterile Compounding Committee. June 1, 2008, is the effective date for the new standards. This paper summarizes the most important changes to USP 797.

Englewood, CO, 31 March – The "USP Chapter 797: Understanding the Revisions" technical paper, authored by Baxa Corporation's Mike Hurst RPh, MBA, is now accessible at Expert411.com for media and professional reference. USP Chapter 797 became official on January 1, 2004. The first major revision was released on December 3, 2007, following years of soliciting feedback and the review of hundreds of responses by the USP Sterile Compounding Committee. June 1, 2008, is the effective date for the new standards. This paper summarizes the most important changes to USP 797.

This technical paper and links to ten other related publications are now available along with Hurst's Expert Profile information at <http://expert411.com/wsn/page3.html>. Other topics include:

- [Overview of USP 797: Pharmaceutical Compounding – Sterile Preparations](#)
- [Oral Medication Dispensers in Clinical Research](#)
- [Enteral Feeding Misconnections](#)
- [Environmental Controls for Sterile Compounding](#)
- [The Limitations of Isolators](#)
- [Pharmacy Considerations for Syringe Batch Processing](#)
- [Safe Handling of Hazardous Drugs](#)
- [USP 797 Requirements for Automated Compounds](#)
- [Technical Bulletin for Risk Level Assessment](#)
- [Outsourcing for USP 797](#)

Hurst worked for 18 years at Swedish Medical Center in Seattle, Washington in operational management, including positions as IV Supervisor and Assistant Director of Pharmacy. His implementation of a syringe infusion system in 1984 had national implications. For the next nine years Hurst wrote, spoke, consulted and acted as a reference site for syringe infusion installations across the country.

Moving to industry full time in 1994, Hurst joined Baxa Corporation as Vice President of Infusion Systems. His job duties have included customer support for syringe infusion system installations, new business and product development roles, and professional services support for various Baxa pharmacy and nursing product lines. Hurst also consulted with a hospital system in the development of a comprehensive USP 797 compliance template that can be applied in other hospital pharmacies.

About Baxa Corporation

Baxa, a customer-focused medical device company, provides innovative, solution-based technologies for medication handling and delivery. Its systems and devices promote the safe and efficient preparation, handling, packaging, and administration of medications. Key products include the PadLock[®] Set Saver,
