ForHealth Technologies Names Steve Thomas Chief Executive Officer

DAYTONA BEACH, FL – May 29, 2007 – ForHealth Technologies, Inc., makers of IntelliFill i.v.™, a high-speed robotic system for the preparation of IV medications in syringes, announced today that Steve Thomas has been named the company's new Chief Executive Officer. Thomas replaces G. Rodney Wolford, who will remain with the company in an advisory capacity.

Thomas will lead plans to grow ForHealth's business, customer relationships and technology innovation as the first high-throughput IV automation solution. Thomas, 51, brings a broad set of work experiences having worked in the technology, information services, health care and sales training industries.

"Steve's leadership success and experience translate extremely well to his new role here at ForHealth," said William Paiva, board member for ForHealth. "We are very excited about the skills Steve brings to our organization and we look forward to the many contributions he will make in all aspects of our business."

Thomas is a member of the Board of Directors for United Way of San Diego. He holds a bachelor's degree in business administration and economics from the University of Indianapolis.

"This is an extremely exciting time at ForHealth Technologies and the IV pharmacy automation market in general. ForHealth was first to market and remains best in the business," said Thomas. "Our installed base of health care leaders is growing and they are delighted with our performance. I am pleased to have the opportunity to lead this innovative company."

About ForHealth Technologies Inc.

Founded in 1998, ForHealth Technologies, Inc., a leader in automation technology for intravenous drug preparation, is committed to increasing patient safety and decreasing operating costs by automating the preparation of small-volume injectable medications in healthcare organizations worldwide. Offering safety, accuracy, efficiency and reliability, its robotic technology, IntelliFill i.v., automates the preparation of IV syringes, greatly enhancing both the safety of patients and the efficiency of hospital pharmacies.
